Skull and Bones, Georgia Guidestones, & ObamaCare

The Georgia Guidestones were christened on March 22, 1980. The first commandment on the stones is a pledge to keep the world's population under 500,000,000. 3-2 is also the secret number of Skull and Bones, the secret society referred to as the "leaders" of the United States and the world. When George W. Bush was asked what 322 signifies, he replied that it was a secret. Bones member Sen. John Kerry (D-MA) who was present at Bush's press confer- ence in 2004, also refused to reply. So as Sunday, March 21 ticked slowly by, watchers of the Georgia Guidestones decided to cover the debate on C-Span wondered, are they purposefully putting this vote off until the clock hits March 22 Greenwich Mean Time – the "time" used by the Illuminati? Is this thing being orchestrated so that it falls on 3-22, the holy day of some crazy secret society, one that corresponds with a secret organization that successfully transferred itself across the At- lantic from Europe to the early 1800s – a secret society for whom March, named after Mars, the Ro- man god of war, has some special meaning?

If so, then what would that mean for the "Health Care Plant," that is far more sinister.

Former Senator and CPS whistleblower clearly victim of foul play

Nancy Schaefer was blaming whistleblowing.

A former Georgia senator and outspoken family rights activist, Schaefer was engaged in action against the criminal crypto- balancing Child Protective Services. She was in the final stages of making a documentary film on the sheer insanity of a for-profit child adoption and foster family system that "named names" when On March 21, 2010 she and her husband were found dead in their Georgia home. Immediately the press reported from a, "disturbing suicide" to "murder" to "suicide" as much as a third of evidence and rumors began surfacing that her husband Bruce was emotionally unstable and under immense stress resulting in the media.

Nancy was the President of the Georgia Eagle Forum (www. eagleforumofga.org). She founded the website as a "call to action." The Georgia eagle forum to "stand firm and fight against reform regardless of the cost" and to "provide the avenue for conservative, pro-life and pro-family citizens/volunteers to actively become involved in the process of self-govern- ment and public policy." The site was "dedicated to our Founding Fathers and to those true Patriots who are committing their unwavering service to stand in the gap against the forces of evil that are bent toward turning our once Christian nation from the true and living God to a godless humanistic worldview; that of socialism, materialism, and bondage.

In an article posted on Infowars.com Garland Favorito writes, "Like so many people, I have known former Sen. Nancy Schaefer for 15 years and spoken to several people who know her. It seems that the 'man behind the curtain' theory is highly unlikely for any one of the following reasons:

1. It is totally against Nancy Schaefer's consistently strong commitment to the sanctity of life principles that she has fought so valiantly to uphold.
2. Nancy and her husband, Bruce, have five children and more than a dozen grandchildren who they would not choose to leave behind so abruptly.
3. Bruce's problem with cancer was corrected and under control so there was no reason to end his life as one senator tried to imply;
4. Nancy or Bruce would not likely agree to commit such an act that violates the fundamental principles of their Christian faith;
5. Bruce was retired and the couple did not appear to be in any type of dire financial crisis that would lead them to commit such acts;
6. Bruce and Nancy knew that her sister who had Alzheimer's disease needed her to help take care of her;
7. Friends who knew the couple best state that Bruce would simply not have the capability to kill his wife;
8. Nancy was dedicated, as a national leader, to help needy people overcome abuse within Child Protective Services organizations;
9. Nancy was actively exposing corruption within the Department of Family & Child Services (DFCS) including efforts by the DFCS director in the county where she lived;
10. Nancy knew that she was needed in the fight against child sex slaves trafficking in Atlanta which has one of the highest activity rates in the country;
11. Bruce was highly supportive of Nancy's work for decades and would have little or no reason to suddenly try to kill her at such a critical juncture in her career.

Nancy's legacy is one of dedication to children and families who were victimized by the very government agencies that were supposed to be helping them. Her starting report as a Georgia state senator can be found at IdahoObserver.com and closely in the mainstream media sweeps this story under the rug and labels anyone not online with investigators as "right wing conspiracy nutz.

"Millions of people believe the new presidency will bring change. Their belief is based on hope and a shift away from the Bush-Cheney administration. Conversely, some of us are certain that Obama is treasonously unqualified to be president, his 'plan' is a mountain of nation-destroying socialist nonsense and his cabinet is organized an act of criminal characters. Rather than discuss our concerns or counter our arguments with logic and reason, Obama supporters, still high on hope, are content to smile and say, 'just wait-you'll see'. It's true, all of us are going to see, but some of us are going to be very disappointed." ~ Don Harkins

"Many of us honored our Christian Faith this month by celebrating the resurrection of Jesus Christ, while Congress adjourned to celebrate the resurrection of Marxism in the United States."

~ The Federal Observer, April 4, 2010

Obama may bypass Congress with massive CO2 Tax

Obama’s promise to open up vast stretches of ocean on the East Coast, Alaska, and Gulf of Mexico to energy exploration is simply a ruse to soften up the public for the long announcement of draconian regulations.

Abandoning all loyalty to the democratic processes the nation holds dear, President Obama has made the decision that getting energy tax legislation through Congress with the approval of the American people is just too much of a pain to bother with. Instead he will have the EPA declare later this month that CO2 is a dangerous global warming gas and will start regulating its emissions immediately, not only in the United States and Europe, not Mexico, or China.

Similar to how Obama used the $5 billion dollar medical study on healthcare companies compet- ing across state lines to sell ObamaCare as a bipartisan bill, his recent decree allowing energy companies to explore (not drill, not produce energy from ... just explore) new patches of ocean for oil is also meant to be a trivial, yet an impressive enough sounding carrots for conservatives right before he stuffs his Marxist thugs down their throats.

House Minority Leader John Boehner re- sponded to Obama by saying: “At the same time the White House makes today’s announcement, the Environmental Protection Agency (EPA) is plotting a new massive job-killer that the American people can’t afford.”

Every American who doesn’t live in a techn- ology adverse commune in California will now pay even more of their hard earned cash to the federal government for absolutely no reason. Put simply, it means $8 for a gallon of gas and 2-3 times higher electricity bills. Also it means the loss of millions more sorely needed jobs as businesses are hit with higher operat- ing costs and the transfer of whatever remains of our manufacturing sector to China where energy is cheaper and they aren’t so concerned about CO2. In the first week alone, American businesses estimated that ObamaCare will cost them $14 billion. By most estimates this latest Obama nightmare will be far more expensive and will literally destroy the economy in less than 20 years.

All because of climate science that has been clearly exposed as inaccurate and untrust- worthy. Obama may or may not be a communist plant sent to destroy America, but he is sure acting like one.

 california redwoods at the State Capitol park in Sacramento are ringed with white "tube socks" What is this material and why is there more of it on the trees each year?

Have you noticed the "white stuff" on the bark of the redwoods? It looks a lot like chalk or paint and has been showing up on trunks over the last couple of years, climbing higher with the passage of time. Are the trees sickening? Black fungus is another report. What is causing this? Rumors circulate about the usual "beetles" or "unidentified fungi."

In the case of the "Tube Socks," as the white material builds up, the bark of the trees will come off in big chunks in your hand. The white stuff also looks like chalk on the roots. One researcher has noticed that the white is most apparent on trees that are watered or irrigated, and not present on trees that are only watered/irrigated, although others say they see it in forests as well.
